

Photovoltaic panel iron ball free fall experiment

free fall 1 - Free download as PDF File (.pdf), Text File (.txt) or read online for free. This lab report describes an experiment to study free fall. Students dropped tennis balls and ping pong balls from the fourth floor of a school and ...

Background. In the 300s B.C.E. in Greece, the philosopher Aristotle theorized that the speed at which an object falls is relative to its mass. In other words, if two objects are the same size, but one is heavier (it has a greater density) than ...
