Can a solar contractor work with a government contractor?

Solar contractors can also pursue federal government work through subcontracting opportunities. Most government construction contracts, including subcontracts, reflect policies contained in statutes and in the Federal Acquisition Regulation (FAR).

What happens if a solar contractor is awarded a contract?

Upon an award, the solar contractor is bound to execute the contract and begin performance. If another contractor that supplied a proposal thinks that it had the best value proposal, the contractor can question the government's evaluation process.

What if a solar contractor fails to provide a bond?

The Miller Act has strict notice requirements with which federal contractors must comply. Failure to provide bonds can lead to termination for default by the federal government. During performance, solar contractors must be familiar with their contractual obligations and rights.

How does GSA work with Solar Contractors?

GSA will only work with companies that have been in business for at least two years and have a balance sheet of sales greater than \$75,000 each of the last two years. Solar contractors can also pursue federal government work through subcontracting opportunities.

What responsibilities do Solar Contractors have during performance?

During performance, solar contractors must be familiar with their contractual obligations and rights. Most of these obligations and rights arise from FAR, including the handling of payments, differing site conditions, contract changes, delays, suspensions and acceleration.

Can a solar contractor be a small business?

To pursue small business opportunities, solar contractors must be certified through the SBA. As an example, to certify as a "Small Disadvantaged Business," the contractor must be owned and controlled by one or more disadvantaged persons and the contractor must be "small," which is based upon a calculation by the SBA.

A typical 4kW solar panel system for 2-3 bedroom houses costs \$5,000 - \$6,000 with installation. Added together, the total cost of solar panels and a battery in the UK is \$13,000 - \$15,500. ... Regional variations: Labor ...

Solar panels make up about a third of the cost of a solar panel system and come in three types, each with its own price tag and features. On average, solar panels cost \$0.70 to \$1.50 per watt. With labor and other factors, solar panel ...
