

## Photovoltaic panel manual transportation and installation costs

How are PV-plus-storage systems estimated?

) of PV-plus-storage systems are estimated using PV capacityto reflect the additional cost required to install hybrid systems over installing stand-alone PV systems. The cost range shows the difference in cost between DC-coupled and AC -coupled systems. b All energy storage capacity rating mentioned in this report are in DC.

#### How much does a PV system cost?

one-axis-tracking utility-scale PV \$1.67/W DC - \$1.68/W DC 100-MW DC one-axis tracker PV colocated with 60 MW DC /240 MWh usable of storage a Cost/Watt DC (W DC ) of PV-plus-storage systems are estimated using PV capacity to reflect the additional cost required to install hybrid systems over installing stand-alone PV systems.

#### How much does solar installation cost?

Installation labor accounts for around 5.5% of the total cost of a residential solar project, according to a 2022 report from the National Renewable Energy Laboratory. That amounts to \$1,375 for a \$25,000 solar project.

#### Do ground-mounted commercial PV systems benefit from low inverter costs?

Ground-mounted commercial PV systems also benefit from lower inverter costsas a result of the rapid shutdown requirements for commercial rooftop systems. Figure 8 and Figure 9 show sensitivity analyses for the 200-kW rooftop system and 500-kW ground-mounted system, with cost categories that vary by location and hardware specification.

#### Do small-scale installers in the residential sector have a larger PV system?

We infer the predominance of small-scale installers in the residential sector using data on residential system financing (Wood Mackenzie 2022b). The higher efficiency of modules assumed for Q1 2022 (CA NEM 2022) results in largerresidential PV system sizes compared with systems in Q1 2021.

### How are rooftop and ground-mounted PV systems modeled?

Both the rooftop and the ground-mounted PV systems are modeled with three-phase string inverters with an ILR of 1.23. Both use 20.3%-efficient monocrystalline silicon modules from a Tier 1 supplier (CA NEM 2022). Figure 10 is a schematic of our commercial-scale system cost model, and Table 5 details the modeled parameters in intrinsic units.

A 4kW solar panel system is suitable for the average home in the UK and costs around £5,000 - £6,000.; The estimated average yearly savings you can expect with a solar panel system range from £440 to £1,005.; If you install a 4kW ...
