How much does a solar panel installation cost?

The best way to evaluate the price of a solar panel installation is in dollars per watt (\$/W). Similar to comparing dollars per square foot when shopping for a home, \$/W helps standardize the cost of solar by showing the cost of solar on a per watt basis. Currently, the average price of a solar panel system installed in the U.S. is \$2.91/W.

Which solar panels are the best?

This report ranked solar panels based on performance under a wide set of stress tests in its lab. The top overall performers, in alphabetical order, were Astronergy, JA Solar, JinkoSolar, Longi Solar, Qcells, Runergy, Trina Solar, and Yingli Solar. This content is protected by copyright and may not be reused.

What are the different types of solar panel warranties?

There are two types of solar panel warranties to be aware of: the equipment (or materials) warranty and the performance warranty. Equipment warranties cover the physical integrity of your solar panels. For example, manufacturing defects, premature wear and tear, and environmentally-caused damages are covered by panel equipment warranties.

What is a polycrystalline solar panel?

Polycrystalline solar panels are also made from silicon, but their cells are made by melting together many fragments of silicon rather than from a single silicon crystal. While polycrystalline panels usually have lower efficiencies than their monocrystalline counterparts, they often have a lower price point.

Are monocrystalline solar panels better than polycrystalline panels?

In general, monocrystalline panels are capable of higher efficiencies than polycrystalline panels. Polycrystalline solar panels are also made from silicon, but their cells are made by melting together many fragments of silicon rather than from a single silicon crystal.
