

Photovoltaic panel models and prices

Which solar panels are best for your home?

SunPower, REC, Panasonic, Maxeon, and Jinko Solar offer the best solar panels. The type of solar panel, power output, efficiency, performance in warm climates, warranty, and price are the key factors to assess when comparing solar panels. The best solar panel for your home can depend on your roof space, shading, and climate.

Are thin-film solar panels a good fit for RVs?

Still, if you're on the go, we believe thin-film solar panels are a good fit for RVs because of their lightweight properties. Depending on which state you live in, your average 6kW solar panel system will cost between to install after accounting for the 30% solar tax credit.

Are solar panels worth it?

Solar panels can generate major savings if you're trying to reduce your electricity costs, carbon emissions or both. The primary factor in determining whether or not solar panels are worthwhile for you is the cost you're currently paying for electricity. The higher your electricity costs, the more a solar panel system will save you in the long run.

How do I choose the best solar panels?

You'll also want to choose panels from a company that backs its panels (and ideally your entire system) with a strong warranty. We reviewed hundreds of solar panel models and found that five brands stand out: SunPower, REC, Panasonic, Maxeon, and Jinko Solar. SunPower, REC, Panasonic, Maxeon, and Jinko Solar offer the best solar panels.

How much does solar installation cost?

Installation labor accounts for around 5.5% of the total cost of a residential solar project, according to a 2022 report from the National Renewable Energy Laboratory. That amounts to \$1,375 for a \$25,000 solar project.

What is a 'solar panel rate' scam?

This is a common scam used to gather personal data and/or trick people into signing long-term solar lease agreements that are far less favorable than owning solar panels. For example, in February 2023, a Facebook page called "Solar Panel Rate" ran multiple ads claiming Elon Musk was paying homeowners \$2,500 to test out new solar technology.
