

# Photovoltaic panel production base address

Where can I find a large-scale solar photovoltaic database?

The United States Large-Scale Solar Photovoltaic Database can be accessed [here](#) or through the USPVDB Viewer. All large-scale solar energy facilities can now be found on a single map thanks to a collaboration between the U.S. Geological Survey and the U.S. Department of Energy's Lawrence Berkeley National Laboratory.

Are solar photovoltaic map services free?

Map services and data downloaded from the U.S. Large-Scale Solar Photovoltaic Database are free and in the public domain.

Where can I find large-scale solar energy facilities?

All large-scale solar energy facilities can now be found on a single map thanks to a collaboration between the U.S. Geological Survey and the U.S. Department of Energy's Lawrence Berkeley National Laboratory. The interactive map is based on the United States Large-Scale Solar Photovoltaic Database (USPVDB) and is called the USPVDB Viewer.

What if the marker does not correspond to my solar production address?

Provide the following information. If the marker does not correspond to your solar production address, use an area approach, using the + and - on the map to geographically define your GPS point. O (Opacity) modifies the opacity of the map and the visualization of solar irradiance through a color gradient defined in L (Legend).

How are PV facility records collected?

The PV facility records are collected from the U.S. Energy Information Administration (EIA), position-verified and digitized from aerial imagery, and checked for quality. EIA facility data are supplemented with additional attributes obtained from public sources.

How many facilities are in the uspvdb?

The latest release includes data on 4,185 facilities covering 47 states (plus the District of Columbia). The most recent facilities added to the USPVDB became operational as recently as the third quarter of 2023. The oldest facilities in the data set were installed prior to 1990.

PVGIS is a free web application that allows the user to get data on solar radiation and photovoltaic system energy production, ... Free and open access to photovoltaic (PV) electricity generation potential for different technologies and ...
