

Photovoltaic panel purchase price inquiry

Do solar panels cost a lot?

Solar panel costs vary from state to state, partly due to the area's average electricity bill and solar suitability. For example, Hawaii pays the most for electricity, while Utah pays the least. Those in Hawaii stand to see bigger savings than those in Utah when going solar.

What is a 'solar panel rate' scam?

This is a common scam used to gather personal data and/or trick people into signing long-term solar lease agreements that are far less favorable than owning solar panels. For example, in February 2023, a Facebook page called "Solar Panel Rate" ran multiple ads claiming Elon Musk was paying homeowners \$2,500 to test out new solar technology.

How much does a 5000 watt solar system cost?

A fully installed solar system typically costs \$3 to \$5 per watt before incentives like the 30% tax credit are applied. Using this measurement, 5,000 Watt solar system (5 kW) would have a gross cost between \$15,00 and \$25,000. The price per watt for larger and relatively straightforward projects are often within the \$3-\$4 range.

Are solar panels a good investment?

In a recent Forbes Home solar survey, we found that homeowners who installed solar panels experienced many benefits to their property and overall quality of life. In particular, over 50% of surveyed individuals were impressed by the energy independence they gained from adding panels.

Do solar panels increase home value?

In particular, over 50% of surveyed individuals were impressed by the energy independence they gained from adding panels. Over 30% of homeowners noted an increase in their home value, and 42.2% of folks reported that they reap increased environmental benefits as well.
