What is a QRail® racking system?

The QRail® Series is an innovative rooftop racking system featuring QClick® and QSplice® technology that simplifies and speeds installation. QRail® seamlessly combines with QuickMount® waterproof mounts to provide a complete, fully integrated racking and mounting solution for installing solar PV modules on any roof.

Does QRail® have electrical bonding?

Electrical bonding is fully integrated into every system component. QRail® also comes with QDesign®, a free online tool to enable quick and easy design of solar array configurations, generate complete engineering reports and calculate a precise bill of material for all the mounting, racking and accessories needed for a complete solar array.

Which solar modules are compatible with QRail®?

QRail® is compatible with virtually all modules and works on a range of pitched roof surfaces. Solar modules can be mounted in portrait or landscape orientation in standard or shared-rail configurations. Aluminum QRails® are available in two sizes to match all climate conditions: Standard and Light.

Is QRail® UL 2703 compliant?

QRail® is engineered for optimal structural performance. The system is certified to UL 2703, is fully code compliant and backed by a 25-year warranty. QRail® is available in Light and Standard versions to match all geographic locations. QRail® is compatible with virtually all modules and works on a range of pitched roof surfaces.
