

Which solar cells can be soldered with ecoprogetti Stringer machines?

Ecoprogetti's stringer machines are designed to work with all the solar cells available on the market (from 166mm to 210 mm), full and half cut. The best soldering output with minimal stress given to the solar cells, realizing high-quality photovoltaic modules with minimized breakages during the transformation process.

Where can I find complete solar turnkey lines for photovoltaic module manufacturing?

If you are looking for complete solar turnkey lines for photovoltaic module manufacturing, Horad will be your reliable PV solar panel line supplier. Cutting and layup machines are often used for automatic aligned positioning of cell strings in a solar panel production line.

What is a solar Stringer machine?

The solar stringer machine is used to solder solar cells together with the use of bus bars into forming strings. This category of assembly equipment is one of the most sensitive since the soldering of the connections is what enables the photovoltaic module to transmit electricity.
