

Photovoltaic panel support installation budget

How much does it cost to install solar panels?

According to our solar experts, solar panels cost about \$19,000 to install in the United States, on average. While the price tag seems steep, incentives and payment options help make the cost of going solar easier to manage. The total cost of a solar installation depends on your location, energy usage, and even the type of equipment you use!

How do I budget a solar panel installation project?

Budgeting your project is stressful and we get that. The first step is to be sure you can afford the system you're planning to install, based on factors like your cash flow, your assets, and what the return will be on your investment. Enter the budget. Some solar panel system installation projects could cost nothing at all.

Should you buy a solar panel system?

Enter the budget. Some solar panel system installation projects could cost nothing at all. You could increase your home value with solar without buying a solar panel system at all. But considering the many financial incentives offered by local, regional, and federal agencies, it could also be lucrative to finance your own solar paneling system.

How can I reduce the cost of installing solar panels?

Short of installing the solar panels yourself (which we don't recommend for safety and many other reasons), one of the only ways to reduce these non-labor soft costs is to use the solar.com marketplace to compare quotes.

Should you install a solar energy system on your roof?

When you install a solar energy system, you're getting more than just solar panels on your roof. Multiple pieces of equipment, such as racking, wiring, and inverters, must be installed so the solar panels can power your home. There are also a number of costs that ensure your system is installed correctly and that the solar company can operate.

What are soft costs for a solar and battery project?

Soft costs include administration costs for the company, customer acquisition and marketing, system design, permits and fees for connecting to the grid, and labor for installation. Here's the NREL's latest soft costs breakdown of a solar and battery project:
