

Photovoltaic panels are placed in an inclined position

Azimuth - This is the compass angle of the sun as it moves through the sky from East to West over the course of the day. Generally, azimuth is calculated as an angle from true south. At solar noon which is defined as an azimuth angle of ...

2. Photovoltaic Panels. Photovoltaic panels are where the electricity is transferred to the grid after being converted by the panels. For such set-ups, an inclination of 37 degrees is optimal. This inclination aids in electricity production all year ...
