

# Photovoltaic plant support

What is photovoltaic plant control?

Combine smart automation solutions with intelligent infrastructure and operate your photovoltaic plant economically. We support your success with Photovoltaic Plant Control. Photovoltaic Plant Control supports reliable, grid code conform control and monitoring of supplied power for stable operation of a PV power plant.

How does a PV power plant regulate voltage?

Voltage regulation actions: the PV power plant is required to help maintaining the grid voltage level. A minimum reactive power capability of the PV power plant is established. Additional ancillary equipment, as FACTS devices, can help to reach the capability limits.

What are photovoltaic structures?

Photovoltaic structures represent the supports for photovoltaic panels. These photovoltaic panels can be with an aluminum frame with a thickness of between 30 mm and 45 mm, or photovoltaic panels with double glass without frames. Below are our structure systems available for ground-mounted power plants:

What is a fixed adjustable photovoltaic support structure?

In order to respond to the national goal of "carbon neutralization" and make more rational and effective use of photovoltaic resources, combined with the actual photovoltaic substation project, a fixed adjustable photovoltaic support structure design is designed.

How to optimize a photovoltaic plant?

The optimization process is considered to maximize the amount of energy absorbed by the photovoltaic plant using a packing algorithm (in Mathematica(TM) software). This packing algorithm calculates the shading between photovoltaic modules. This methodology can be applied to any photovoltaic plant.

How to choose suitable locations for photovoltaic (P V) plants?

The selection of the most suitable locations for photovoltaic (P V) plants is a prior aim for the sector companies. Geographic information system (G I S) is a framework used for analysing the possibility of P V plants installation. With G I S tools the potential of solar power and the suitable locations for P V plants can be estimated.
