

Is solar PV a competitive source of new power generation capacity?

Solar PV is emerging as one of the most competitive sources of new power generation capacity after a decade of dramatic cost declines. A decline of 74% in total installed costs was observed between 2010 and 2018 (Figure 10).

How has the growth in PV markets impacted the power industry?

The exponential growth seen in PV markets has led to the development of large-scale power plants, which has increased demands for better tools for inspection and monitoring.

Are solar rooftop PV projects a co-operative?

In Brixton, London, three solar rooftop PV projects have been set up under a co-operative structure. The projects have been implemented on council estates and residents of these estates are the members of the co-operative society.

What is the share of glass-glass modules in photovoltaic?

According to the International Technology Roadmap for Photovoltaic (ITRPV), in 2018 the share of glass-glass modules was only 5% and is expected to just double by 2020.
