What is a performance warranty on a solar panel?

A performance warranty guarantees a maximum level of degradation- typically between .25% and .75% - per year so that in 25 years the panel will still have 80-90% of the power output it did in its first year. Performance warranties are important for sizing solar systems to maintain 100% offset for 25 years.

How long is a solar panel warranty?

Solar panel warranties vary depending on the manufacturer, but in the solar industry, a 10-year product warranty and a 25-year performance warranty are typically considered the minimum standard. However, some manufacturers provide a 25-year product warranty and extend the performance warranty to 30 years. How Much Does a Solar Panel Warranty Cost?

What is a solar energy power output warranty?

Solar energy power output warranties help guarantee that your panels won't rapidly lose efficiency, which would lead to lower and lower energy savings over time. The typical solar array pays for itself in around 11 years and provides energy savings of more than \$31,513 over the following 14 years of expected panel life.

What types of warranties cover solar panels?

There are two basic types of warranties that cover solar panels. A product warranty protects you from defects in a solar panel stemming from material quality or manufacturing errors. This is also referred to as an equipment or materials warranty

Do photovoltaic cells need a power warranty?

Photovoltaic (PV) cells gradually lose performance, and this means the amount of electricity generated will decrease slightly each year. However, a power warranty ensures that this will happen at a very slow rate.

Should I pay for an extended solar panel warranty?

However, we generally don't recommend paying for an extended panel warranty. In most cases, included warranty coverages are plenty long to protect your equipment through the panel payback period and beyond, which means your solar panel system will be profitable by the time they expire.
