

Photovoltaic solar panel inspection specifications

What is a solar panel inspection?

The solar inspection process is one of the most time-consuming parts of any company's operations, from design to installation. PV Education 101: A Guide for Solar Installation Professionals shows how to frame solar panel inspection when speaking to your customers about development costs and installation timelines.

What is included in a solar inspection?

There's some published examples of what is included in a solar inspection such as SolarAPP+ and California's solar permitting guidebook. During an onsite solar inspection, systems are evaluated for installation quality, equipment compatibility and compliance to building codes, and ensuring the system was installed as it was permitted.

Do solar panels need a building inspector?

When looking at the solar panels, a building inspector must verify that they are properly installed in accordance with the manufacturer's specifications based on the local AHJ requirements, environmental factors, and aspects of the type of structure.

What are the requirements for PV installation?

PV installation shall comply with requirements of the standard plan. PV system operating at 80 volts or greater shall be protected by a listed DC arc fault protection. (CEC 690.11) All work done in a neat and workmanlike manner. (CEC 110.12) 10. DC modules are properly marked and labeled.

Do I need to meter a photovoltaic system?

It is assumed that aluminum framed photovoltaic (PV) panels mounted on a "post" and rail mounting system, the most common in the industry today, will be installed by the homeowner. While metering the system is encouraged, the specification does not address system wiring elements for associated system sensors or monitoring equipment.

What happens during an onsite solar inspection?

During an onsite solar inspection, systems are evaluated for installation quality, equipment compatibility and compliance to building codes, and ensuring the system was installed as it was permitted. In some parts of the country, a licensed electrician is required to be present during an electrical inspection.
