

Photovoltaic solar power generation tax code

Are solar photovoltaic systems eligible for a tax credit?

Solar photovoltaic (PV) systems installed in 2020 and 2021 are eligible for a 26% tax credit. In August 2022, Congress passed an extension of the investment tax credit (ITC,) raising it to 30% for installations between 2022-2032. (Systems installed on or before December 31, 2019, were also eligible for a 30% tax credit.)

Can I claim a solar tax credit if I sign a PPA?

You cannot claim the credit if you are leasing or in an agreement to purchase electricity generated by the system, including a solar power purchase agreement (PPA). If you sign a solar lease or PPA, the system owner can claim and keep the federal tax credit and any local incentives.

Can I claim a tax credit for a solar system?

Location: The solar system is located at your primary residence or secondary home in the U.S. You may also claim the federal tax credit for an off-site community solar project if the electricity generated is credited against your home's electricity consumption without exceeding it. **Ownership:** You own the solar PV system.

Are solar projects eligible for ITC or PTC?

Solar systems that are placed in service in 2022 or later and begin construction before 2033 are eligible for a 30% ITC or a 2.75 ¢/kWh PTC if they meet labor requirements issued by the Treasury Department or are under 1 megawatt (MW) in size. Click graphic to download as PDF. What projects are eligible for the ITC or PTC?

The investment tax credit (ITC) is a tax credit that reduces the federal income tax liability for a percentage of the cost of a solar system that is installed during the tax year. [1] The production tax credit (PTC) is a per kilowatt-hour (kWh) tax ...
