What is Xiyang 100 MW photovoltaic project?
On June 30,2022,China Energy Construction Investment Corporation invested in the construction of the Xiyang 100 MW photovoltaic project under the general contract of Shanxi Power Construction EPC,which was connected to the grid for power generation,marking that the project became the first 220 kV booster stationin Shanxi Province this year.

Who is constructing Kaiyuan city photovoltaic power generation project?
It is understood that the Kaiyuan City photovoltaic power generation project is invested and constructed by Zhongguangtong Energy Yunnan Company. The project is expected to have an installed capacity of 10GW and a total investment of 40 billion yuan. It is planned to be developed in five years,which is a big deal.

Who won a 100 MW photovoltaic power station project in Tunisia?
At the end of July 2022,Energy China Tianjin Power Constructionand Northwest Research Institute jointly won the bid for the 100 MW photovoltaic power station project in Kairouan,Tunisia,achieving another country breakthrough in the African region.

What is building integrated photovoltaics (BIPV)?
Building integrated photovoltaics refers to solar panels incorporated into the architecture of a building. Essentially,BIPV concerns how the system looks and functions on a building. There is currently no existing standard procedure for developing BIPV. What is the value of this project for society?

What is Dezhou Dingzhuang reservoir photovoltaic power generation project?
Dezhou Dingzhuang Reservoir Photovoltaic Power Generation Project invested about 819 million yuan,with a total capacity of 320 MW. The construction of the first phase is 200 MW,and after completion,it will become the largest floating photovoltaic power station in the world.

Are actor-specific barriers associated with solar PV systems in construction?
Actor-specific barriers were identified and analysed using an abductive approach. In light of established definitions of systemic innovation, the process of implementing solar PV systems in construction involves challenges regarding technical and material issues, competencies, and informal and formal institutions.
