

# Photovoltaic support embedded pile production equipment

How many pile drivers do Solar Contractors need per day?

So, Vermeer created a range of pile drivers that are specifically designed to meet the demands of commercial solar contractors and the expansive solar fields they install. According to Savage, solar contractors typically want to average 150 to 200 piles driven per day per machine.

Why should you choose Vermeer pile drivers?

The solar industry continues to surge, and quality equipment is needed to keep up with the quick pace of solar field installations. Vermeer offers a range of pile drivers designed to meet the demands of commercial solar contractors and the expansive solar fields they install.

Can a robotic pile driver meet the challenges of utility-scale solar?

Built engineers have spent thousands of hours developing an advanced autonomous solution that can rise to meet the challenges of utility-scale solar. Don't compromise on your tools. The RPD 35 is a fully autonomous robotic pile driver that combines four steps -- surveying, pile distribution, pile driving, and data collection -- into a single robot.

Are pile drivers remote-operated?

Many pile drivers have a fully remote-operated machine, while others are a manually operated machine. Also, units like the Vermeer PD10 are available as either a ride-on machine or fully remote-operated machine.

Why should you use a robotic pile driver?

Robots reduce schedule uncertainty, limit rework, and operate with little interruption, which maximizes equipment utilization and uptime to create productivity unseen with traditional means and methods. The RPD 35 is a field-proven force multiplier that works up to five times faster than a traditional pile driver.

What should a contractor consider when choosing a pile driver?

If a contractor plans to focus on utility scale projects, they could consider either the small or mid-sized pile drivers due to having multiple units on the same jobsite for a number of days. Another consideration is the mode of operation that best fits the customers.
