

# Photovoltaic support line positioning requirements

Do you need a pull line for a solar PV system?

To facilitate the wiring of the solar PV system at a later date, the builder may also want to include a pull line in the conduit, particularly if the conduit run is lengthy or has multiple bends.

What is a photovoltaic solar system code section?

This collection of provisions imports code sections which address Photovoltaic Solar Systems, and the structural, fire safety and energy conservation measures for them. These are specific to Solar Systems.

Does a roof support solar photovoltaic panels or modules?

The structure of a roof that supports solar photovoltaic panels or modules shall be designed to accommodate the full solar photovoltaic panels or modules and ballast dead load, including concentrated loads from support frames in combination with the loads from Section CS507.1.1.1 (IBC 1607.12.5.1) and other applicable loads.

Are solar panels required for a roof photovoltaic live load?

Solar photovoltaic panels or modules that are independent structures and do not have accessible/occupied space underneath are not required to accommodate a roof photovoltaic live load, provided the area under the structure is restricted to keep the public away.

Do PV systems have supply-side connections?

To this point, installers have been making supply-side connections in PV systems following the Code to the best of their ability. But with some admittedly vague rules around a few key issues, we wanted to address supply-side connections here.

How do you interconnect a PV system to a utility system?

The National Electric Code allows for a few different ways to interconnect PV systems to utility systems. In two editions of Code Corner, Ryan Mayfield with Mayfield Renewables, explains busbar, load side interconnections in 705.12 (B) (3) (1) and (2), and then supply side connections in 705.11 (C) and (D).

It can also be used for kinds of shelves, ceiling frames, drywall partition, steel structure building, and so on. The series of Hangzhou Roll Forming Technology's solar PV support forming machines can produce double-in-roll c-shaped steel ...
