

# Photovoltaic support modeling company

What is the design process for photovoltaic systems?

The design process for photovoltaic systems has, for the most part, transitioned from a simple electrical equation to a complicated three-dimensional architectural, solar and financial analysis.

What are photovoltaic structures?

Photovoltaic structures represent the supports for photovoltaic panels. These photovoltaic panels can be with an aluminum frame with a thickness of between 30 mm and 45 mm, or photovoltaic panels with double glass without frames. Below are our structure systems available for ground-mounted power plants:

Should you use a PV Designer or a Solar Pathfinder?

If visual quirks can be tolerated, the PV Designer is a noteworthy and useful tool. The Solmetric SunEye was the first site survey device to take the steampunk style Solar Pathfinder and drag it into the 20th century by essentially adding batteries and the ability to capture and edit shading images.

How many photovoltaic panels can be installed?

Photovoltaic panels can be configured in a portrait or landscape panel section of up to 6 landscape panels. Carport type photovoltaic parking systems structure. Intended for the production of electricity using photovoltaic panels. energy use for the house or nearby premises. Photovoltaic system with installation of vertical type bifacial panels.

Can photovoltaic panels be mounted on a galvanized roof?

Photovoltaic system with panel mounting on the roof of a galvanized structure. Photovoltaic panels are rarely mounted on the roof to allow the entry of sunlight and rain. The structure has no walls and can have openings up to 15 meters without intermediate pillars. This system is designed for agricultural and keeping animals in free outdoor areas.

General features are: cloud based, cross platform, PV design on Google Maps, image or sketch, full financial analysis (many currencies and support mechanism types), unlimited number of projects and proposals in PDF, shading simulation ...

Company Introduction: Taizhou Suneast New Energy Technology Co., Ltd is a high-tech enterprise specializing in solar photovoltaic bracket design, production, installation and related consulting services. Company headquarters is located ...
