

# Portable photovoltaic panel customization

Can I make a solar panel in a custom shape?

Yes, it is possible to make a solar panel in a custom shape. At Voltaic, we manufacture custom and standard small solar panels and while most are rectangular, we have experience designing and deploying a full range of interesting shapes and sizes.

Are portable solar panels eco-friendly?

Solar energy is an excellent, eco-friendly option for staying powered up on the go, but traditional panels are bulky and designed to stay fixed in one place. However, a large number of portable solar panels are now available that are lightweight, powerful, and built to withstand the elements.

Are monolithic solar modules a good choice?

Our cutting edge monolithic construction solar modules are more robust than any others on the market, far surpassing the performance of typical laminate or glass solar modules. No other product can offer a full 10-year warranty! Using an OEM solar module assures your product is optimized for performance and completely reliable.

Can I create a custom panel mount?

In addition to customizing the embedded screws or adding through holes, we offer the ability to create a custom panel mount for your specifications. This includes the design and manufacture of custom brackets, gaskets or VHB seals. Our standard wire has strain relief is about 12 inches long and terminates in a 3.5x1.1mm plug.

**Coating Options** We recommend a coating for the panel based on your durability, cost, and design constraints. The four options are: Urethane: Highly UV resistant and durable. Our urethane solar panels last up to 10 years in the sun with ...
