What is a pole mount solar rack?

The module rails are a mill-finish structural aluminum angle. These mounts include stainless steel module mounting hardware as well. Standard top-of-pole mounts are adjustable from 15 degrees to 65 degrees in 10-degree increments. These pole mount solar racks are made to mount on standard sizes of SCH40 steel pipe.

Why do we use pole mounted solar panels?

Why Use Pole Mounted Solar Panels? Tamarack Side of Pole mounts are the often-imitated, never-duplicated industry standard. For over 25 years we have made, and continually improved upon, these oh-so-helpful and easy-to-install mounts. These versatile mounts can be installed on a pole or flat surface.

Can a solar panel be mounted on a pole?

Systems from 10 Watts to 480 Watts using pole-mount solar panels can easily be mounted on vertical poles ranging from 2" to telephone poles. Many versions are shown below from single module mounting structures (links to below) to multiple module mounting structures on larger poles.

What type of hardware does a top-of-pole rack have?

Standard rack assembly hardware is zinc-plated Grade 5. A stainless steel hardware upgrade is optional. All standard Top-of-Pole Mounts have six tilt-angle settings from 15° to 65° in 10° increments. The elevation adjustment is positive locking in each position eliminating the possibility of slippage.

Does a top-of-pole rack need a hardware upgrade?

A stainless steel hardware upgrade is optional. All standard Top-of-Pole Mounts have six tilt-angle settings from 15° to 65° in 10° increments. The elevation adjustment is positive locking in each position eliminating the possibility of slippage. The racks are balanced about the pivot bolt to make elevation adjustments easy.

Whether roof mount, ground mount, top of pole mount, side of pole mount, tower mount or custom solar panel mounting, we can accommodate your requirements. Call (877) 297-0014 for discount pricing, more information or to order.
