

# Price trend of metal silicon mud for photovoltaic panels

What are the trends in photovoltaic applications 2022?

The IEA PVPS recently published its latest report on "Trends in Photovoltaic Applications 2022." The PV industry recorded higher prices across the upstream sector, mostly driven by high polysilicon prices. Other factors involved high silver and aluminum prices, increased logistics costs, and shortage of semiconductors.

Is the photovoltaic industry experiencing a split?

Image: PV Tech The pricing dynamics within the photovoltaic industry chain are witnessing a split, with noticeable drops in polysilicon and wafer prices. The dip in wafer prices, in particular, is becoming more pronounced. Conversely, there's a rising trend in module prices month over month.

What happened to Photovoltaic prices in October 2024?

Overview by technology of different price points in October 2024, including the changes over the previous month: Only tax-free prices for photovoltaic modules are shown. The prices stated reflect the average offer prices in retail and on the European spot market (customs cleared).

What is the price of Mono dense poly?

Prices of various categories of silicon material increased by 31% compared with two weeks previously. Last week, the mainstream trading price of mono dense poly was between RMB208,000-220,000 per ton, and the highest price was more than RMB230,000 yuan per ton. About five companies received new orders last week and market activity remained.

How much does a crystalline silicon wafer cost?

The spot price for crystalline silicon wafers, which generally follows the price of polysilicon, was \$0.78/piece for 158.75 mm to 161.75 mm wafers at the end of July 2022, an increase from the \$0.74/piece in November 2021, and the \$0.35/piece in January 2021, according to the report. Larger wafers of 182 mm were priced at \$0.97/piece.

Why did polysilicon prices increase last week?

According to the Silicon Industry Branch, polysilicon price increases last week were in part due to wafer manufacturers increasing their operating rates, resulting in considerable demand for silicon material.
