

What is photovoltaic (PV) technology and how does it work? PV materials and devices convert sunlight into electrical energy. A single PV device is known as a cell. An individual PV cell is usually small, typically producing about 1 or 2 ...

Solar Photovoltaic Cell Basics. When light shines on a photovoltaic (PV) cell - also called a solar cell - that light may be reflected, absorbed, or pass right through the cell. The PV cell is composed of semiconductor material; the ...

Most panels on the market are made of monocrystalline, polycrystalline, or thin film ("amorphous") silicon. In this article, we'll explain how solar cells are made and what parts are required to manufacture a solar panel.
