How much does a battery cost on EnergySage?

The median battery cost on EnergySage is \$1,133/kWh of stored energy. Incentives can dramatically lower the cost of your battery system. While you can go off-grid with batteries, it will require a lot of capacity (and a lot of money!), which means most homeowners don't go this route. What exactly are home backup batteries?

What is a home energy storage system?

Most home energy storage systems provide partial backup power during outages. These smaller systems support critical loads, like the refrigerator, internet, and some lights. Whole-home setups allow you to maintain normal energy consumption levels--but at a cost.

Why should you choose a home energy storage system?

With independence from the utility grid, you can avoid the inconvenience of outages without sacrificing your daily routines. Most home energy storage systems provide partial backup power during outages. These smaller systems support critical loads, like the refrigerator, internet, and some lights.

How much energy can a battery store?

For most battery systems, there's a limit to how much energy you can store in one system. To store more, you need additional batteries. And, in most cases, batteries can't store electricity indefinitely. Even if you don't pull electricity from your battery, it will slowly lose its charge over time.

Why do people install home battery storage systems?

"Energy independence is one of the biggest reasons people install home battery storage systems," says Gerbrand Ceder, professor at UC Berkeley and faculty staff scientist at Lawrence Berkeley National Laboratory. "It's seamless, so you don't even notice when power switches from the grid to your battery backup system."

How many kWh does a battery backup system store?

Comparatively, partial-home battery backup systems usually store around 10 to 15 kWh. Given that power outages are infrequent in most parts of the country, a partial-home battery backup system is generally all you'll need. But, if your utility isn't always reliable for power, whole-home battery backup may be the way to go.
