What is the solar ready vets network?

The Solar Ready Vets Network is a group of solar workforce development programs for veterans and transitioning military service members. Solar Career Map developed by the Interstate Renewable Energy Council (IREC). Use the Solar Career Map to explore 40 jobs across four industry sectors and identify more than 60 routes to advancement between them.

How does solar photovoltaic manufacturing work?

In the United States, solar photovoltaic manufacturing is highly automated. Machines do the majority of work: cutting semiconducting materials, such as crystalline silicon, into wafers, turning them into solar cells, and assembling the solar cells into solar panels.

What is the work culture at Tata Power Solar?

Our work culture harps on being innovative and a responsible citizen leading to a brighter future for all. Tata Power Solar provides employees with the opportunity to implement new ideas as leaders are unearthed from challenging situations.

What is the difference between a CSP and a photovoltaic plant?

CSP plants are more like typical power plants and require incorporating large steam turbines and storage tanks, plus a large, flat area for the solar array. Photovoltaic plants are less complex, but are a challenge for engineers to design because the panels are optimally configured to efficiently harvest solar power.
