

Query the latest auction records of photovoltaic panels

What is the US large-scale solar photovoltaic database?

The U.S. Large-Scale Solar Photovoltaic Database provides the locations and array boundaries of U.S. ground-mounted photovoltaic facilities, with capacity of 1 megawatt or more.

Are solar photovoltaic map services free?

Map services and data downloaded from the U.S. Large-Scale Solar Photovoltaic Database are free and in the public domain.

Do competitive auction schemes allow emerging markets to procure solar generation?

Bottom Line: When procurement criteria and execution appropriately allocate risks, competitive auction schemes may allow issuers in emerging markets to procure solar generation at true market prices. Table 2: Competitive Procurement Process Design Criteria

Are competitive auctions the new normal for renewables?

IEA. Licence: CC BY 4.0 Have the prices from competitive auctions become the "new normal" prices for renewables? Prices are nominal; higher values for onshore wind in 2017-18 result from the United Kingdom's contracts for difference (CfD) auction, and in 2021 are associated with a delayed project from the Jordanian auction held in 2014.

What is Enerdata's res auctions monitor?

This includes subsidies and remuneration schemes such as the feed-in-tariffs, feed-in-premiums mechanisms and, increasingly, more market-based support instruments and in particular auctions. Enerdata's RES auctions monitor is a very detailed, regularly updated database showcasing past and current auctions on a global level.
