Does SolarEdge support inverter firmware updates?

SolarEdge Support. An inverter firmware update is performed per site and should be performed separately on each inverter on that site. The CPU, the DSP1, and the DSP2 firmware can be updated for each inverter. Access to Remote Settings is only available for account admin users. Log in to the Monitoring Platform.

How do I update the firmware on my Fronius inverter?

On the inverter's user interface, go to "System" --> "Update". To start the update, click "Browse file" and select the downloaded .swu file or drag and drop the .swu file to the "Drag & Drop file here" section. Note: Do not disconnect the power supply during the update process! A USB firmware update is possible on the following Fronius inverters:

How do I download a SolarEdge firmware file?

If further information is required, please contact SolarEdge Support. Use Firefox or Chrome browsers to download firmware files. The firmware file can only be loaded to a memory card that meets the specifications listed in the Software Upgrade using SD/MicroSD card application note.

How do I upgrade bridging firmware?

Step 1: Check the current firmware version on your devices. If they are already the bridging version or above, then directly upgrade with the Neutral version. Step 2: Get the bridging firmware and latest neutral firmware files from SolaX Service at [service@solaxpower.com](mailto:service@solaxpower.com). Step 3: Prepare a USB drive. NOTE
