

Serbia microgrid project landed

Does Serbia have a solar project?

The contract is the latest in a line of solar projects backed by Serbia's Ministry of Mining and Energy this year, which includes plans for a 1 GW solar panel factory and another 500 MW of solar. Figures from the International Renewable Energy Agency state Serbia had deployed a total 137 MW of solar by the end of last year.

How many MW of battery storage will be developed in Serbia?

Up to 200 MW of battery storage will be developed across the sites. Image: Ministry of Mining and Energy, Tanjug Plans for 1 GW of new solar in Serbia are set to go ahead after the signing of an implementation agreement.

How many MW of solar is installed in Serbia?

The government has formed a working group to organize the tender, select successful bids, and negotiate with the chosen strategic partner. According to the Association of Renewable Energy Sources of Serbia, the country has installed around 50 MW of solar. However, that figure is not exact, as there is no official registry at this stage.

What is Serbia's largest solar plant?

In April, Serbia switched on its largest solar plant, the 9.9 MW DeLasol PV project in the Lapovo, central Serbia. Serbia currently aims to deploy 8.3 GW of PV by 2024, according to a draft plan released by the government last year.

How many GWh will Serbia produce a year?

The Serbian government approved the proposed sites in September. The largest in the deal is a 460 MW facility in the territory of Negotin and Zaječar, followed by a 302 MW plant in Bošnjace. All six plants will be connected to a single transmission network and are expected to produce a combined 1,600 GWh annually.

Is solar a good option for Serbia?

A statement published on the Serbian government's website says solar is the most optimal solution to quickly reach large capacities from green sources, without burdening and endangering the stability of the transmission network. Serbia currently gets more than 60% of its electricity from fossil fuels.

The EU-supported investments in Serbia include the construction of a new 400 kV grid section from Kragujevac to Kraljevo and the upgrade to 400 kV of the grid sections from Obrenovac to Bajina Bashta and from Bajina Bashta to Visegrad ...
