What is a solar generator kit?

A Solar Generator Kit has everything you need to go solar quickly and easily. Whether you want to keep your devices powered up during a blackout or take power with you on the go, Solar Generator Kits from Shop Solar have the top portable power stations on the market yet still manage to save you 50% or more on the cost of a solar power system.

What is a solar backup generator?

Solar backup generators are designed to power up when the electrical grid fails and are an efficient alternative to installing a complete system. These generators use several batteries to store energy for high-wattage output. They provide sufficient backup power to turn on lights, televisions, computers, and small to midsize appliances.

What can a solar powered generator charge?

These generators can charge power tools in the shop, laptops for remote work, and personal devices like bluetooth headphones and speakers. A solar-powered generator with a higher power capacity can even power household appliances in the event of a power outage.

Are solar generators portable?

Solar generators are available as both portable generators and backup home generators. Most solar generators are portable, lightweight, and have a built-in handle. The best portable solar generators are used to provide power for construction sites, campers, events, or other settings where access to electricity is limited.

Should you buy a solar generator or a power station?

Ideally, you want a solar generator that juices up your electronics quickly, but you also want a power station that can be charged up fairly quickly. This usually isn't something you have to worry about with modern power stations from top brands like Jackery or EcoFlow. With solar generators, the tightest bottleneck is the solar panels themselves.

How much power does a portable solar generator use?

The wattage required to run each item may vary, and most portable solar generators can power in the range of 100-500 watts. Smaller units typically have a lower power capacity and can only charge small devices.
