

Soft film photovoltaic panel manufacturers

What flexible solar panels does PowerFilm produce?

PowerFilm produces several flexible solar panels, including the 220 Watt Foldable Solar Panel (FM16-14400). These solar panels are known for being lightweight, durable, and truly portable. They are mounted to weather-resistant fabric that can be folded for storage and unfolded for use.

Is PowerFilm a US based solar company?

Celebrating over thirty years in business, PowerFilm is proud to be one of the few US-based solar manufacturing companies operating today. The Soltronix brand brings PowerFilm expertise, innovation, and commitment to US-based semi-flexible crystalline silicon solutions.

How are thin film PV panels made?

Our thin film PV panels are manufactured using cutting-edge CIGS (Copper-Indium-Gallium-Selenide) with patented monolithic integration. Our patent-protected processes enable us to precisely apply layers of these elements on a thin (25micron) polyamide substrate to create resilient and featherweight panels that convert sunlight into electric power.

What is ASCA's organic photovoltaic (OPV) film?

As a result of many years of research and development, the ASCA's organic photovoltaic (OPV) film is a breakthrough solar solution for the energy transition challenge. The unique properties of this environmentally friendly, custom-made solution is capable of making virtually any surface active, regardless of its shape or material.

Which company makes flexible solar panels?

SunPower's is a leading global company that produces flexible solar panels (SunPower Corp.). They have served various industries, from space technology to residential households and small to large commercial buildings, with their solar technology.

Who is PowerFilm?

PowerFilm designs and manufactures custom solar cells, panels, and power solutions for energy harvesting, portable, and remote power applications using proprietary thin-film or high-efficiency crystalline PV technology. We develop high-quality custom solar solutions for IoT, transportation, military, and consumer applications.
