

Soft photovoltaic panel warranty

What types of warranties cover solar panels?

There are two basic types of warranties that cover solar panels. A product warranty protects you from defects in a solar panel stemming from material quality or manufacturing errors. This is also referred to as an equipment or materials warranty.

What should I look for in a solar panel performance warranty?

Ideally, you should look for a solar panel performance warranty with the following conditions: Some solar manufacturers will guarantee a degradation rate as low as 0.25% per year, and a performance warranty period of up to 30 years. The best solar companies offer homeowners an installation warranty of their own.

How do I get a solar panel warranty?

Generally, the most robust warranties are obtained by hiring installation companies certified by the solar brands they represent. Alternatively, long warranties can also be secured from solar manufacturers that provide their own installation services. What Is Not Covered by a Solar Panel Warranty?

What does a solar installation warranty cover?

While manufacturer warranties primarily cover issues related to the solar panels themselves, such as material defects, workmanship defects, and loss of power output, the solar installation warranty extends additional protection to the entire photovoltaic system.

Why are solar panel warranties important?

Solar panel warranties are important to make sure you get the expected electricity savings over time. For example, if your solar energy system is expected to save at least \$1,200 per year, a 25-year warranty means you get \$30,000 in guaranteed savings. Solar panel warranties also help you qualify for favorable loan conditions.

Are solar panel warranties transferable in a home sale?

In most cases, solar panel warranties are transferable to the new owner in a home sale. However, some warranties are restricted to the original owner, so it is crucial to clarify this point with the manufacturer and installer offering the warranty.
