

Solar Mounting System Factory

Where should solar panels be mounted?

Mounting allows the panels to be adjusted for optimal tilt, which can be based on latitude, seasons, or even time of day -- to ensure maximum solar energy production. The most common locations for mounting are on the roof, using solar roof mounts, or on the ground with ground-mount options.

What are solar panel mounts & racks?

Solar panel mounts and racks are equipment that secures solar panels in place. Mounting allows the panels to be adjusted for optimal tilt, which can be based on latitude, seasons, or even time of day -- to ensure maximum solar energy production.

What is Solar FlexRack?

Solar FlexRack offers fixed tilt ground mount and single-axis tracking solutions all designed with unique features to reduce overall project costs. SunModo develops, manufactures and sells innovative solar PV racking and mounting solutions to residential installers, commercial integrators, and other solar providers in North America.

Are solar carports custom designed?

Our solar carports are custom designed for each project location. Once we design you a custom layout and install the solar canopy, there's nothing left to do but let the sunshine. We offer both single and double row solar carport systems for any residential, commercial, or industrial parking lot and open-space area.

How much does a 6kW Solar System cost?

Including racking and mounting, an average 6kW solar system would cost about \$18,000 given the US average solar panel cost of about \$3.00 per watt as of January 2023. After applying the federal solar tax credit of 30%, that works out to \$12,600.

What training does a solar installer need?

Our on-demand training courses are developed by a team of solar professionals who have trained hundreds of installers on Pitched Roof Comp, Tile, and Ground Mount. Many courses also provide NABCEP CE's. Whether you're new to solar, training your crew, or refreshing your credentials, the Installer Certification Program was built for you.
