

These tools are great for getting started, but make sure to work with a solar installer for a custom estimate of how much power your solar energy system is likely to generate. For its analyses, NREL uses an average system size of ...

OverviewComponentsModern systemOther systemsCosts and economyRegulationLimitationsGrid-connected photovoltaic systemA photovoltaic system for residential, commercial, or industrial energy supply consists of the solar array and a number of components often summarized as the balance of system (BOS). This term is synonymous with "Balance of plant" q.v. BOS-components include power-conditioning equipment and structures for mounting, typically one or more DC to AC power converters, also known as inverters
