

Where are solar PV EPC companies located?

According to the Mercom report, For 10 solar PV EPC companies, the Asia-Pacific (APAC) region made up 52.4% of EPC companies' capacity, followed by the Americas at 42.1% and Europe, the Middle East, and Africa (EMEA) at 5.5%. Here, we have presented the complete list of EPC companies in 2020:

How many PV solar installations are there in the world?

The resulting dataset expands the previous publicly available facility-level data for PV solar energy by 432% (in number of facilities), including 18,449 new installations in China, 9,906 in Japan, 4,525 in the United States, 2,021 in India and 17,918 in the European Economic Area.

What is the supply chain for solar PV?

The supply chain for solar PV has two branches in the United States: crystalline silicon (c-Si) PV, which made up 84% of the U.S. market in 2020, and cadmium telluride (CdTe) thin film PV, which made up the remaining 16%. The supply chain for c-Si PV starts with the refining of high-purity polysilicon.

Is Adani solar a good solar PV EPC company?

It is worth mentioning that Adani solar had stood in the sixth rank in the 2019 list while in the 2020's top 10 solar PV EPC company list, it jumped to the first spot among other solar PV EPC developers. Did you know?

What is the solar photovoltaics supply chain review?

The Solar Photovoltaics Supply Chain Review explores the global solar photovoltaics (PV) supply chain and opportunities for developing U.S. manufacturing capacity.

How do we provide a global inventory of PV installations?

Here we provide a global inventory of commercial-, industrial- and utility-scale PV installations (that is, PV generating stations in excess of 10 kilowatts nameplate capacity) by using a longitudinal corpus of remote sensing imagery, machine learning and a large cloud computation infrastructure.
