

Solar Tracking Bracket Materials

What are solar tracking mounts?

Solar tracking mounts are advanced systems that automatically adjust the position of the solar panels to follow the sun's movement. This maximizes the solar gain and significantly increases the energy output of the solar panels.

What is a solar PV mounting bracket?

Solar photovoltaic (PV) mounting bracket is the "skeleton" supporting solar PV modules, whose performance directly affects the operation stability, power generation efficiency and return on investment of solar PV plants, playing an important role in the construction of PV power stations.

What materials are used in solar PV mounting brackets?

In the solar PV mounting bracket industry chain, the upstream is mainly composed of bulk metal materials such as steel and electromechanical components such as rotary reducer. The overall market pattern of the upstream is relatively dispersed and the supply is relatively adequate.

What are mounting brackets & rails for solar panels?

Mounting Brackets are the primary components that attach the solar panels to the mounting surface. They come in various types depending on the mounting surface (roof, ground, pole, etc.). Rails: Rails are long, horizontal structures attached to the solar panels using clamps. They provide a stable base for the solar panels.

How big is the solar PV tracking bracket market?

According to Wood Mackenzie, the global solar PV tracking bracket shipment reached 44 GW in 2020. With reduction in cost, increase in stability and the application of double-sided modules, the shipment of solar PV tracking bracket will reach 110 GW in 2025 globally, with a market space of nearly 60 billion RMB (about USD 9 billion).

What is a solar tracking system?

The focus of this project, which was a solar tracking system, was rather a subsystem for supporting a complete PV system. Throughout the whole operation of the tracker, the tracking algorithm was totally based on the lighting source, independent from the operation of solar modules.
