

# Solar generator in the wild

What is a solar powered generator?

Solar-powered generators--also called portable power stations--are a growing sector of the power market. I started using these a few years ago and was thrilled with having a clean, efficient charging system that doesn't roar or burn through gas.

Can a solar powered generator power a house?

A solar-powered generator with a higher power capacity can even power household appliances in the event of a power outage. And the fact that these are solar-compatible means you aren't reliant on the electrical grid to recharge them. What is the best way to charge a generator?

Can a solar generator power a gas generator?

Solar generators are starting to catch up to gas generators in terms of power output. The Bluetti AC500 is a great example of this. With the pure sine wave 5000W inverter, it can power a wide range of heavy duty appliances that you'd normally run with a noisy propane or gas generator.

Are solar generators a good investment?

Solar generators can be a pricey investment. Before you start looking at the various power stations and solar panels and package deals available, it's important to know how much you are willing to spend. Underspending on a power station can result in inadequate power needs in the case of a power outage or while adventuring off grid.

What is a good portable solar generator?

If you want a portable solar generator that can power most appliances, the Jackery Explorer 2000 Pro is a good pick. It comes with a built-in 2200W inverter, meaning it can power most household appliances including a full size refrigerator, TV, blender and others. You can also run power tools off the 2000 Pro.

Should you buy a camping solar generator?

That's because the battery is the heaviest and most costly component in a solar generator. So if portability is important for you, you may have to compromise on capacity. If you are getting a camping solar generator, make sure it's light enough to carry over short distances by hand (under 20lbs).
