

For example, ASCE 7-16 now clearly states that the weight of solar panels and their support are to be considered as dead loads [1], roof live loads need not be applied to areas covered by solar panels under a certain spacing or height [2], ...

There are more than 8 billion square meters in the United States of rooftops where solar panels could be installed. This represents more than 1 terawatt of potential solar capacity. With recent improvements in solar panel design, ...
