

Solar photovoltaic power generation is easy to do in foreign trade

Why is the global solar PV product trade important?

The global solar PV product trade plays an important role in facilitating PV product production and utilization and in mitigating climate change. Traded solar cells and modules in 2017 could generate 2325.25 TWh of electricity over their 30-year lifetimes.

Why do countries need photovoltaic products?

In countries with low access percentages, a significant portion of the population lacks a reliable electricity supply. Thus, these nations often seek to expand their energy infrastructure, and photovoltaic products provide a cost-effective renewable solution, which will drive their demands for photovoltaic imports.

Does China have a role in the global deployment of solar photovoltaic technology?

A green expansion: China's role in the global deployment and transfer of solar photovoltaic technology. *Energy Sustain. Dev.* 60,90-101. doi:10.1016/j.esd.2020.12.006 Li, L., and Zhu, H. (2020). Analysis on trade effect of green barriers and on agricultural product export and maritime transport in China. *J. Coast.*

Can photovoltaic products boost China's economy?

As a crucial means of generating clean energy, photovoltaic products hold considerable development potential (Zhu et al., 2021), have even been identified by the National Development and Reform Commission's Energy Research Institute as a crucial tool for stabilizing China's foreign trade and boosting the economy.

Where is the photovoltaic (PV) market developing?

Figure 7. The photovoltaic (PV) market development in China, Germany, Japan and the USA from 1990 to 2017 (Data source: IEA. PVPS. National Survey Report of PV Power Applications). By the end of 2009, the cumulative PV installed capacity in China was only 300 MW.

Does trade protectionism affect China's solar PV exports?

Zhu et al. (2021) examined the impact of both internal and external forces on China's solar PV export during 2007-2016, and found that trade protectionism and some non-tariff barriers inhibit China's PV exports.
