

# Solar power generation base in the mountains

What is the world's largest solar power base?

A mega solar and wind power base under construction in China's seventh-largest desert Kubuqi in the Inner Mongolia Autonomous Region, is set to become the world's largest power generation base of its kind.

Where is a high-altitude solar power plant located?

This high-altitude solar power plant sits in a stunning location, floating on a lake in between the Swiss Alps. This reservoir doubles as a floating solar power plant, smack back in the middle of the Swiss Alps.

Should solar panels be installed on snow-covered mountains?

The placement of solar panels on snow-covered mountains can boost the production of electricity when it is most needed -- in the cold, dark winter. Solar-power systems have long been hampered by a seasonal problem: the panels produce more energy in summer than in winter, at least in the mid-latitudes, where much of the planet's population lives.

How many solar panels does the alpin solar Dam produce a year?

The dam's almost 5,000 solar panels produce 3.3 million kilowatt hours of energy per year, enough to supply around 700 houses. Installation of the panels was completed last year and production at the site has already begun. The reflection from the snow helps solar power production at the AlpinSolar dam. Do alpine solar plants produce more electricity?

“One of the qualities of alpine solar plants is that, especially in winter, they produce up to three times more electricity than a comparable facility in the midlands,” says Jeanette Schranz, communications lead for renewables at Swiss energy producer Axpo.

What is the world's first high-altitude floating solar farm?

This is the world's first high-altitude floating solar farm, perched like a raft atop Lac des Toules, a man-made reservoir near the village of Bourg-Saint-Pierre in the canton of Valais near the Swiss-Italian border.

This is the world's first high-altitude floating solar farm, perched like a raft atop Lac des Toules, a man-made reservoir near the village of Bourg-Saint-Pierre in the canton of Valais near the Swiss-Italian border. It is a one-of-a-kind power ...
