

Solar power generation capacity target

How many GW of solar PV will be installed in 2030?

Continuous support for all PV segments will be needed for annual solar PV capacity additions to increase to about 800GW, in order to reach the more than 6000 GW of total installed capacity in 2030 envisaged in the NZE Scenario. Distributed and utility-scale PV need to be developed in parallel, depending on each country's potential and needs.

How much solar power does China have in 2023?

China added almost twice as much utility-scale solar and wind power capacity in 2023 than in any other year. By the first quarter of 2024, China's total utility-scale solar and wind capacity reached 758 GW, though data from China Electricity Council put the total capacity, including distributed solar, at 1,120 GW.

How many GW of solar power will there be in 2025?

The combined capacity at pre-construction and announced stages for utility-scale solar power reaches 387 GW and 336 GW for wind. This includes the second and third waves of "mega wind & solar bases" with a combined capacity of approximately 503 GW, which will come online between 2025 and 2030.

Will solar power increase global renewable power capacity by 2030?

Globally, solar PV alone accounted for three-quarters of renewable capacity additions worldwide. Prior to the COP28 climate change conference in Dubai, the International Energy Agency (IEA) urged governments to support five pillars for action by 2030, among them the goal of tripling global renewable power capacity.

How many GW will solar PV produce in 2024?

The current manufacturing capacity under construction indicates that the global supply of solar PV will reach 1100 GW at the end of 2024, with potential output expected to be three times the current forecast for demand.

How many MW is a solar project?

Data includes solar project phases with capacity of 20 megawatts (MW) or more and wind project phases with a capacity of 10 MW or more. Capacity under construction for China and Europe updated in June 2024, while other regions accurate to December 2023. What happened in the past year?
