

What do you need to know before installing a solar system?

If you are planning to install a solar system or buy a solar generator, you must master the basics of electricity and power generation. This means fully understanding what volts, amps, watts, and watt-hours are and how they relate to meeting your power generation needs.

How do I get help installing a solar generator?

If you opt for an EcoFlow solar generator solution, the EcoFlow Support page will help connect you to someone who can help you get up and running or to professional installers (if required). You can also find EcoFlow product manuals and setup guides available for free online. A solar generator prepares you for power outages.

How do I prepare for a solar panel installation?

Installing solar panels helps homeowners save money and invest in cleaner energy. To prepare for an installation, determine your energy needs and home compatibility with a solar panel system. The installation requires complicated electrical work and paperwork that any reliable solar installer can handle.

How do I get solar power?

Here are the steps to take to get powered by sunshine. Choose a solar installer. An installer can help you determine whether your roof is suitable for solar panels. Begin by researching qualified, insured installers online or asking for recommendations from people who've gone solar.

How do I choose a solar backup generator?

If you only need your solar backup generator to power a few essential items, confirm the energy consumption of each device. Add up everything you need to power, and you can determine what the output capacity of your generator must be. It's crucial to keep in mind that many appliances require more energy to start up than they need to run.

How do I choose a solar installer?

Choose a solar installer. An installer can help you determine whether your roof is suitable for solar panels. Begin by researching qualified, insured installers online or asking for recommendations from people who've gone solar. Comparison-shop by asking multiple installers to come assess your roof.

Net metering is an arrangement between solar energy system owners and utilities in which the system owners are compensated for any solar power generation that is exported to the electricity grid. The name derives from the 1990s, when the ...
