

Solar power generation sales share

What is the global solar power market size?

The global solar power market size was valued at USD 253.69 billion in 2023 and is projected to be worth USD 273 billion in 2024 and reach USD 436.36 billion by 2032, exhibiting a CAGR of 6% during the forecast period. North America dominated the solar power industry with a market share of 41.30% in 2023.

What is the global solar PV market like in 2022?

The solar PV market is dominated by crystalline silicon technology, for which the production process consists of four main steps: In 2022, global solar PV manufacturing capacity increased by over 70% to reach 450 GW for polysilicon and up to 640 GW for modules, with China accounting for more than 95% of new facilities throughout the supply chain.

What was the value of the solar power market in 2023?

Fortune Business Insights says that the global market size was valued at USD 253.69 billion in 2023 and is projected to reach USD 436.36 billion by 2032. What was the value of the Asia Pacific solar power market in 2023?

Which country has the highest solar power market share in 2023?

North America dominated the solar power industry with a market share of 41.30% in 2023. The global COVID-19 pandemic had been unprecedented and staggering, with solar power experiencing higher-than-anticipated demand across all regions compared to pre-pandemic levels.

How will solar PV & wind impact global electricity generation?

The share of solar PV and wind in global electricity generation is forecast to double to 25% in 2028 in our main case. This rapid expansion in the next five years will have implications for power systems worldwide.

Will solar power increase in 2021?

It is projected to rise considerably in the upcoming years and boost the market. The total installed capacity of solar PV will reach 842.14 GW globally by the end of 2021, representing the second-largest renewable electricity source after wind.

The International Energy Agency (IEA) reported that the United States installed 15.6 GW ac of solar capacity in in the first quarter (Q1)/second quarter (Q2) of 2024 (the Solar Energy Industries Association reported 21.4
