## SOLAR PRO.

## Solar power heater for home use

Can a solar air heater heat a house?

Solar air heaters can heat a house. However, your best use of solar-heated air is to reduce the heating and cost of your conventional heating system. You will want to have a traditional heating system for backup cloudy, rainy, or snowy days or nights. On many sunny days, your backup system may not need to run at all.

Are solar air heaters a good choice?

Because solar air heaters are more effective at heating smaller rooms, they have more in common with traditional space heaters than whole-house heating systems. Solar air heaters can be incredibly energy efficient and can reduce your heating costs by as much as 70 percent.

What is a solar-powered heater?

Solar-powered heaters take the comfort and convenience of conventional heating and combine it with energy-efficient solar energy for an interior heat source that's as great for your energy bills as it is for that cold spot in your bedroom.

Can a solar space heater reduce heating costs?

Solar space heaters can reduce heating costs by up to 70 percent. However,most building codes require a backup heating system,so your solar space heaters should be integrated with an existing heating system. One specific way to use solar water heating is for pools - solar pool heating systems are a great way to harness the sun's thermal energy.

What are the benefits of solar heating?

Solar heating improves your home's energy efficiency and has a better return on investment (ROI) than traditional heating systems. Our guide explores the benefits of solar heating, the types of systems available and how to choose the best solar heating system for your home.

Is solar heating a good alternative to traditional heating?

Although many homeowners use solar panels to power their homes, there are other ways to take advantage of solar energy. One option is solar heating, an alternative to traditional air and water heating systems. Solar heating improves your home's energy efficiency and has a better return on investment (ROI) than traditional heating systems.

To save on energy costs, supplement your heating needs with a solar air convection heater that collects heat from the sun to create heat. Note they aren"t powerful enough to heat an entire home. But they are great for heating a ...
