

Solar power mobile phone charger

Where can I buy a solar cell phone charger?

Solar Rechargeable Lantern/Cell Phone Charger. 150 Lm. Built In Solar Panel, Hi-Vis Yellow Shop through a wide selection of Cell Phone Solar Chargers at Amazon.com. Free shipping and free returns on eligible items.

What is a solar phone battery charger?

Whether you're traveling, camping, or simply walking around, a solar phone battery charger provides an easy and environmentally-friendly solution. Solar phone battery chargers use the same technology as rooftop solar panels to charge your phone or other devices.

Should you use a portable solar panel Charger?

Typically, portable solar panel chargers are meant to function as a source of backup power, not as the primary way to charge your phone every day because of their slow charging speed. The quality and efficiency of solar-powered phone chargers are getting better all the time.

Do you need a solar phone charger?

You might find yourself relieved to have a solar phone charger on hand, which not only tends to be lightweight and easy to carry around, but these gadgets effectively leverage the sun's power to power up your devices.

How much power does a solar phone charger use?

A charger between 10 and 15 watts of power is usually sufficient for charging one or maybe two phones. The wattage of a charger is the amount of solar electricity it can produce, so larger panels usually mean more wattage. There are two main types of solar phone chargers to keep an eye out for:

How do solar phone chargers work?

Solar phone chargers use the same technology as regular solar panels but on a much smaller scale. The sun hits a small solar panel, which either charges a battery bank or directly plugs into and powers your phone, much like solar panels on your roof can power your home directly or charge a battery system.
