

Solar power plant built in Western Australia

The solar farm features 119,056 solar panels and can withstand winds of 288 kilometres per hour, in a region regarded as the most cyclone prone in Australia. New infrastructure specially built for the project also includes a 1 ...

OverviewProjectsInstallations by typePotentialIncentivesSupply chainRenewable energy targetsSee alsoProjects with a power rating less than 100 MW are not listed. A 20 MWp solar power plant has been built on 50 hectares of land in Royalla, a rural part of the Australian Capital Territory south of Canberra. It is powered by 83,000 solar panels, and can power 4,400 homes. It was officially opened on 3 September 2014. It is the first solar plant facility in the Australian capital, and ...
