

Solar power station operation and maintenance training

What is solar operation & maintenance training?

The tailored certification for Solar Operation & Maintenance Training puts you at the forefront of best practices. After going through this course the student will be able to: Carry out Operation of Solar PV Power Plant. Carry out Electrical Maintenance of the Solar PV Power Plant. Carry out Civil/Mechanical Maintenance of the Solar PV Power Plant.

What is solar design and installation training?

Solar technologies and the codes and standards that govern them continue to rapidly evolve as we move toward a clean energy future. Solar design and installation training prepares workers to properly design, install, and maintain these solar energy assets.

What is a solar energy demand skills training project?

Safer Foundation Solar Energy Demand Skills Training Project - provides skills training and support for people in the criminal justice system to fill the growing workforce needs of the solar industry.

Are solar energy systems safe?

Deploying safe, reliable solar energy systems requires a skilled workforce that is properly trained to design and install these technologies. Additionally, maintaining these systems across decades of expected operation requires experienced technicians who can identify and address any safety or performance issues.

How many solar workers will be needed by 2022?

By 2022, As many as 81,000 highly skilled workers would be needed to carry out annual and ongoing performance data monitoring of solar projects totaling 100 GW. An additional 182,400 workers would be needed by 2022 to carry out low-skill operation and maintenance functions for the numerous solar rooftop and utility-scale projects.

What training & support programs are available?

Recent training and support programs include: Advancing Equity Through Workforce Partnerships funding program - facilitates the rapid deployment of solar energy technologies while supporting an inclusive workforce with opportunities for union membership.

Solar Operation & Maintenance Training program is a three-month course taught in distance learning /Online learning mode. This program equivalent to the Solar Technician ITI course is designed to train technicians who can install, maintain ...
