Why should you buy a solar system?

Generate your own clean energy from the sun for free with solar. Add Powerwall to store your energy for use anytime you need it. Tax incentives and flexible financing options ensure you get the best price for your solar system. Power your home with emissions-free, renewable energy directly from the sun.

How does a solar system estimate work?

Your solar estimate will show a total dollar cost for the total system size and capacity, typically measured in kilowatts. The total system size and capacity for your home is determined by how much energy you use along with your roof's sunlight exposure, and panel efficiency. System size is shown in kilowatts (kW) or watts (W).

What solar incentives are available in my state?

See where Sunrun currently operates and what solar incentives may be available in your state. The most common solar incentives include state tax credits, net metering and rebates from your local utility. No matter what state you live in, you'll also be eligible for the federal solar tax credit when you purchase your own solar system.

What does a professional solar installer do?

Professional installers mount solar equipment to your roof, wire the system into your home and ensure that all the components are functioning properly. Solar Panels: Advanced panels have a higher wattage, meaning fewer panels are required for the same system production, resulting in less labor cost.

Why should you install solar with Powerwall?

When you install solar with Powerwall, the Tesla app gives you control over all the products in your Tesla ecosystem. Decide if you want to optimize your generated energy for savings, backup protection--or both. See how much energy your system is generating, how it's being used and how much it's helping you save.
