

Solar support rectangular tube price

How much does solar tube cost?

I greatly appreciate your support! Sun tube is becoming mainstream and it's a good idea to have a closer look into the solar tube costs. Solar tube and material purchase cost vary from \$500 to \$1000 depending on the area of coverage and manufacturer. That includes the material purchase and installation.

Who is Solatube & why should you buy a sun tunnel?

Of note, Solatube was the pioneer in the sun tunnel market. Their products have been on the market for over 20 years. Their engineering team was so focused on the amount of light captured by their product, they have paid less attention to things like aesthetics and the quality of light delivered until recently.

Are solar tubes good for air conditioning?

Sunlight is a clean, renewable resource. Solar tubes reduce interior heat gains in the summer that come from a high overhead sun pouring in through a skylight. That means your air conditioning system doesn't have to work as hard to cool off your home.
