

# Specifications and standards for seamless construction of photovoltaic panels

What are the standards for photovoltaics?

There are numerous national and international bodies that set standards for photovoltaics. There are standards for nearly every stage of the PV life cycle, including materials and processes used in the production of PV panels, testing methodologies, performance standards, and design and installation guidelines.

What are the NFPA requirements for solar PV systems?

The electrical portion of solar PV systems shall be installed in accordance with NFPA 70. CS512.2 (IFC 1204.2) Access and pathways. Roof access, pathways, and spacing requirements shall be provided in accordance with Sections CS512.2.1 (IFC 1204.2.1) through CS512.3.3 (IFC 1204.3.3).

What conditions should a roof support a photovoltaic panel system?

Roof structures that support photovoltaic panel systems shall be designed to resist each of the following conditions: 1. Applicable uniform and concentrated roof loads with the photovoltaic panel system dead loads.

What are the requirements for ground-mounted photovoltaic panels?

Ground-mounted photovoltaic panel systems shall comply with Section CS512.1 (IFC 1204.1) and this section. Setback requirements shall not apply to groundmounted, free-standing photovoltaic arrays. A clear, brushfree area of 10 feet (3048 mm) shall be required for groundmounted photovoltaic arrays. CS512.5 (IFC 1204.5) Buildings with rapid shutdown.

Do PV modules need to be updated?

As the work of IEC TC 82 has progressed, a number of new standards for PV components and balance of system equipment have been introduced. Accordingly, the requirements for the safety of PV modules must also be updated to reference these new standards and to fully leverage the benefits that can be achieved by compliance with their requirements.

Are solar panels required for a roof photovoltaic live load?

Solar photovoltaic panels or modules that are independent structures and do not have accessible/occupied space underneath are not required to accommodate a roof photovoltaic live load, provided the area under the structure is restricted to keep the public away.
